

SMARTBRIDGE
Let's Bridge the Gap

Brainstroming & Idea Priortization Template

Date	26/06/2026
Team Id	
Project Name	Smart Lender
Maximum Marks	3 Marks

Step 1:Brainstorm & Idea Listening

The Smart Lender project is an AI and Machine Learning-based solution designed to simplify the loan approval process. It predicts whether an applicant is eligible for a loan by analyzing important factors such as income, credit history, loan amount, education, employment status, and other applicant details.

s.no	Team Member	Idea/suggetion	Cateogory	Group no
1	P Appa rao	Use Machine Learning to predict loan approval based on applicant details.	AI / Machine Learning	1
2	B jyotsna	Consider Credit History as the primary factor for loan eligibility prediction.	Data Analysis	1
3	T Gnana Ahalladhini	Develop a Flask-based web application for loan prediction.	Web Development	2
4	P Appa rao	Provide instant Loan Approved or Rejected results after prediction.	Automation	2
5	B jyotsna	Validate applicant inputs before processing the prediction.	Data Validation	3

6	T Gnana Ahalladhini	Store applicant and prediction records for future reference.	Machine Learning Model	4
---	---------------------	--	------------------------	---

Step 2 Idea Prioritization

In the Smart Lender project, different ideas were evaluated based on feasibility (how easily the idea can be implemented) and importance (how valuable the idea is for the project). The most important and feasible idea is using Machine Learning to predict loan eligibility, as it forms the core functionality of the system.

Group no	Final Idea	Feasibility	Importance	Priority	Selected
1	Predict loan eligibility using Machine Learning	High	High	1	Yes
2	Use Credit History for accurate prediction	High	High	1	Yes
3	Develop a Flask-based web application	High	Low	2	Yes
4	Provide instant Loan Approval/Rejection results	Low	High	2	1
