Maximum Marks	3 Marks

Define Problem Statements

The Smart Lender project addresses the challenges faced by loan applicants, credit officers, and financial institutions during the loan approval process. Manual verification is often slow, time-consuming, and may lead to inconsistent decisions. By using Machine Learning, the system predicts loan eligibility based on applicant information and credit history, enabling faster, more accurate, and reliable loan approval decisions while improving the overall customer experience.

ps	Problem Statement	I Am	But	Because	This Makes Me Feel
1	Slow loan approval process	I am a loan applicant.	I have to wait a long time for loan approval.	The bank performs manual verification of my application	Frustrated and uncertain.
2	Timeconsuming loan evaluation	I am a credit officer.	I need to review many loan applications manually.	The evaluation process depends on checking multiple applicant details.	Overloaded and stressed.
3	Difficulty identifying eligible applicants	I am a bank manager.	I want to reduce the risk of loan defaults.	Manual decisions may not always be	Concerned about financial losses.

				accurate or consistent.
