Data Flow Diagram

A **Data Flow Diagram (DFD)** illustrates how data moves through the Smart Lender system. It shows the flow of information from the user to the machine learning model and back to the user. The DFD helps in understanding the inputs, processing steps, data storage, and outputs of the system.

DFD Symbol Legend

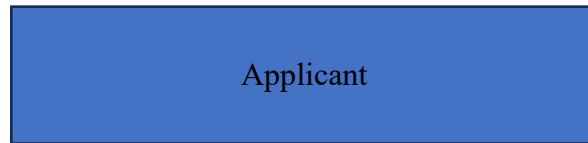

Name	Symbol	Description
External Entity	Rectangle (□)	Represents an external user or system that sends data to or receives data from the Smart Lender system. Example: Applicant.
Process	Circle / Rounded Rectangle (○)	Represents an activity or process that transforms input data into output. Example: Validate Input, ML Prediction.
Data Flow	Arrow (→)	Represents the movement of data between entities, processes, and data stores.
Data Store	Open-ended Rectangle / Parallel Lines (Data Store)	Represents a repository where data is stored. Example: Loan Dataset, Trained ML Model.

EXAMPLE FOR SMART LENDER PROJECT:

Level 0 DFD (Context Diagram):

Loan Approval Prediction

Level1 DFD
