

Project Demo Planning

Date	28/06/2026
Team Id	
Project Name	Smart Lender
Maximum Marks	1 Mark

Project Demo Planning :

Project Demo Planning is the process of organizing and preparing the project presentation before the final demonstration. It defines the sequence of demo sections, responsibilities, timing, and key features to be presented, ensuring a smooth, well-structured, and effective demonstration of the **Smart Lender** project.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the Smart Lender project and explain its objective of predicting loan approval using Machine Learning.	0.30	P.Appa rao
2	Problem Statement	Explain the challenges of traditional loan approval and the need for an automated prediction system.	0.40	B.Jyotsna
3	Solution Overview	Briefly explain the system architecture, Machine Learning model, Flask application, and project workflow.	0.45	T.Gnana Ahalladhini

SMARTBRIDGE
Let's Bridge the Gap

S.No	Demo Section	Description	Duration (mins)	Responsible Member
4	Live Feature Demonstration	Demonstrate entering applicant details and displaying the loan approval prediction result.	0.50	P.Appa rao
5	Results & Benefits	Present model accuracy, prediction results, key features, and benefits of the Smart Lender system.	0.40	B.Jyotsna
6	Conclusion	Summarize the project, discuss future enhancements, and thank the evaluators.	0.25	T.Gnana Ahalladhin

Demo Flow Summary:

Step	Activity	Notes
1	Introduction	Introduce the project objectives and explain the motivation behind Smart Lender.
2	Problem Statement	Describe the limitations of traditional loan approval systems.
3	Solution Overview	Explain the architecture, technologies used, and Machine Learning workflow.
4	Live Demonstration	Enter sample applicant details and display the loan prediction result.
5	Results Discussion	Discuss prediction accuracy, system performance, and project benefits.
6	Conclusion & Q&A	Summarize the project and answer questions from the evaluators.
